Projects

Food Web App   **React, Redux, Express, MongoDB, Node.js**

– Developed a full-stack web application using React for the fron- tend and Node.js, Express, and MongoDB for the backend, pro- viding a platform for users to browse and order food items.
– Integrated Stripe payment method to facilitate secure online transactions, ensuring smooth checkout processes for users.
– Utilized EmailJS for seamless email notifications, enhancing user engagement and order tracking functionalities.
– Designed and implemented a responsive and intuitive user inter- face with React, ensuring a modern and user-friendly experience across devices.
– Implemented CRUD (Create, Read, Update, Delete) operations to manage food items and orders, ensuring data consistency and integrity.
– Incorporated input validation and error handling mechanisms to maintain data accuracy and enhance user experience.
– Enhanced application usability with advanced search and filtering capabilities, allowing users to easily find desired food items.

Social Media App   **React, Redux, Express, MongoDB, Node.js**

– Developed a full-stack social media application using React for the frontend and Node.js, Express, and MongoDB for the backend, providing users with a platform for creating profiles, posting updates, and connecting with others.
– Implemented Redux for state management, ensuring efficient data flow and centralized state handling across the application.
– Designed and implemented RESTful APIs with Express to manage user profiles, posts, comments, and likes, ensuring scalability and performance.

- Utilized MongoDB for data storage, employing Mongoose for schema validation and database operations to maintain data consistency.
- Created responsive and interactive user interfaces with React, focusing on usability and modern design principles to enhance user engagement.
- Implemented features such as user authentication, authorization, and password hashing for secure access and data protection.
- Integrated third-party APIs for additional functionalities, enhancing user experience with features like social sharing or authentication services.
- Conducted thorough testing, including unit testing and integration testing, to ensure application functionality, reliability, and performance.

Champions Choice   **WordPress**
- Customized a WordPress theme using Elementor to create a modern, responsive design that enhanced user experience across devices.
- Integrated WooCommerce for a streamlined product catalog, shopping cart, and checkout process.
- Set up product categories, filters, and search functionality to improve navigation and customer experience.
- Provided ongoing maintenance, including plugin updates, performance optimization, and troubleshooting.
- Implemented payment gateway solutions, including credit card processing, ensuring secure transactions.

John Spiridis photography   **WordPress**
- Developed and customized a WordPress website using WPBakery Page Builder, delivering a responsive, visually appealing design optimized for mobile and desktop.
- Created dynamic page layouts and integrated essential plugins for enhanced functionality, such as contact forms and image galleries.
- Optimized the website for SEO and performance, ensuring fast load times and improved search engine rankings.
- Ensured cross-browser compatibility and mobile responsiveness through meticulous testing and adjustments.
- Provided ongoing maintenance, including plugin updates, troubleshooting, and website enhancements based on user feedback.
